

Stay in good shape!

... with original sanstrap® stretchbands

The exciting solution

No more slipping or wobbling

Secure packaged goods quickly and easily with sanstrap stretchbands. The smart solution that saves material, time, money and nerves. Placed around the packaged goods in seconds, nothing slips or wobbles.

sanstrap®, elastic stretchbands made of polyethylene, are the convincing alternative to the use of stretch film, rubber bands, strapping or adhesive tape for securing packaged goods.

No damage to packaging and labels, no sticky plastic waste, recyclable as mono-material.

sanstrap® is part of the basic equipment for storage and transport.

sanstrap® stretchbands

The ideal pre-securing for internal transport.

Available in perforated rolls, in handy dispenser boxes or sturdy metal boxes.

Nothing
wobbles, nothing
slips

sanstrap®
never lets you down!
sanstrap® supports you in all
storage and transport tasks.
The stretchbands are impressive:

- Easy handling
- Strong elasticity
- Enormous resilience
- Different versions
- Mono-material disposal
option

Securing packaged goods on pallets is so easy - whether it's bundles, cartons, different goods or layers of packaging:

pull the sanstrap® off the roll

tear off at the perforation

open the double-layer
sanstrap® loop

slightly pre-stretch the stretchband

easy and effortless clamping around
the top layer of packaged goods

Done.

In seconds.
Easy as pie.
Safe.

Always the right stretchband

Always a perfect fit for every application, every container and every packaging task:
The variety of sanstrap® variants makes it possible, with different thicknesses, widths, lengths, colours and also special properties such as antistatic.

sanstrap® standard

Also available as sanstrap® re made from recycled material
and sanstrap® eco made from BioPE
